

# Asset & Fault Management System

Comhairle Cathrach  
Bhaile Átha Cliath  
Dublin City Council

**NICANDER**  
INTELLIGENT SOLUTIONS

## BeProAct

Transportation Department, Dublin City Council

### About Dublin City Council

#### Dublin City and Council

- Dublin City is a historical city with its fair share of narrow streets and heritage buildings.
- Transportation is an essential service that is managed by Dublin City Council. As the City moves to more sustainable means of travel, it is key to keep the city moving and to meet the current and future demands of the city.
- Correct operation of the Transportation Assets of the City are ensured by the Asset & Fault Management System.

Dan O'Neill.

Our achievements from previous Interreg NWE Projects

The Dublin Launch of the 'Spot the HGV' App from  
the Interreg North-West Europe Be-Good Project

### Our Part in the Project

Real-time data driven fault management system connecting faults with the appointed contractor and capturing all the data.

Current Client Base

#### Data Driven Asset Maintenance

- Development of an Asset Management data model.
- Complex data model for supporting the Maintenance Management for a diverse range of Assets with various supporting contracts.
- Faults can be picked up in real-time and immediately notified to the supporting contractor and managed via the Fault maintenance life cycle.
- Planned maintenance integrated within the system.
- The data generated from the Fault Life Cycle is the main source of information for the Performance KPI Reporting Process.

### Benefits to the Project and Partnership

#### Benefits from the Extensive Live Data.

- Asset management data model.
- Dashboards & Transparency of data.
- Opportunities for data driven asset management research by applying Machine Learning and current A.I. techniques/process to the data.

#### Future Work

- Future expansion of the system into the New National Public Transport Control Centre currently being established.
- Expansion into national assets.
